

**MXL**

**POWER IN AN EXTRA LARGE SIZE**

## The scrubbing machine that changes the user experience from the very first glance

The shape of the machine inspires a sense of safety and control, thanks to the harmonious and balanced design that promises a user experience that is out of the ordinary. MxL has the power you need to work in any environment and under the most difficult conditions, as a result of its careful design, which combines high-performance components with the most advanced technology.

As soon as you turn it on, you can feel the value of a machine created to enhance the professional results of every cleaning operation, with innovative features that provide operators with all the tools necessary to successfully complete their work.

Its robust design is not afraid of any environment

The wrap-around lines delineate an enveloping structure made from polyethylene, which protects the heart of the machine and enhances its robust appearance.

The brush head of the disc version is equipped with splash guards that keep the water inside the work area, preventing splashes that could compromise the quality of the end result.

The brush head and the squeegee are made from aluminum, a material chosen for its durability and reliability over time as well as for its lightness, to provide you with better manoeuvrability and comfort.

MxL gives more value to your time: it reduces downtimes and increases productivity

#### QUIET OPERATIONS

With the Eco Mode and FNC technologies that lower the noise level, MxL safeguards the health of the operator and that of the people in the environment where it is used.

#### EASY MAINTENANCE – COLOR CODED PARTS

Parts which must be cleaned at the end of every shift are color coded in yellow. Regular maintenance of these parts ensures the correct operation of the machine, along with consistent performance.

#### ACCESSORY STORAGE COMPARTMENT

The operator can work in absolute tranquility in the knowledge that when he needs them, all the accessories are close at hand, and once finished with, these can easily be placed back in their compartment, allowing the cleaning operation to proceed without long interruptions and wasted time.

#### FFF – FIMAP FAST FILL

Automatic system for filling the fresh water tank, lets the operator perform other activities while the tank quickly fills up.

## NO TRAINING

No doubt will keep you from your work. The integrated video tutorials on the display demonstrate how to perform routine and extraordinary maintenance, to prevent uncertainty and wasted time.

The spray gun has a dual role. During machine maintenance, it facilitates the rinsing of the tanks at the end of the shift, but it can also be used during the work, to moisten stubborn dirt stains and make them easier to remove.

Powerful and versatile, it is always ready to meet your goals

## POWER MODE

When performing localized heavy duty cleaning, pressing the Power mode function activates a work mode that uses all the scrubbing parameters to the maximum, for a short period of time. This enables the machine to act with greater force on a specific area just for the time needed, without wasting resources and having to resort to passing over the area more than once.

### Consistent cleaning results

Pressure on the brushes is kept constant, delivering consistent high cleaning results on any type of flooring.

### FLR-FIMAP LONG RANGE

Increases productivity by up to 70%.

### No risk of slipping

The powerful 3-stage vacuum motor leaves the floor immediately dry and safe.

### Great autonomy

Work for up to 5 hours non-stop.

### VACUUM WAND

Vacuum wand allows to clean areas that are out of reach of the machine and successfully fulfill the task.

## Equipped to give you safety and protection

The equipment on the MxL prevents accidents, increases safety while working and supports the operator at all times, so that everything is always under control, without ever encountering difficulties.

### ACTIVE TECHNOLOGIES to prevent accidents

Enhances visibility  
in dim light.

TOUCH SCREEN  
DISPLAY

For a fast operator  
training and reduced cost  
to clean.

VIDEO  
TUTORIALS

Control device letting  
the operator set the  
required speed.

CRUISE CONTROL

Maximize work safety in  
all conditions.

LED HEADLIGHTS

Automatically operated  
when the machine stops  
It works as a safety parking brake.

ELECTROBRAKE

**SOS MxL**

## PASSIVE SYSTEMS to help the operator in case of emergency

SOS DEVICE

Reduces time to service in case of emergency.  
The red button sends an SMS alert to receive prompt help,  
reducing downtimes.

EMERGENCY  
STOP

By pressing a single button the machine stops immediately.

## EXPERIENCE CONNECTIVITY

Discover the FFM universe and experience the advantages of being constantly connected, with My.Machine app!

Watch the video

FIMAP FLEET MANAGEMENT

Keep tabs on your machines remotely when you want and from wherever you want!

Developing new technology to improve efficiency is one of the core missions of Fimap.

An example of this is FFM, the Fimap Fleet Management system which collects the data sent by the machines and transforms it into valuable information accessible to you easily in real time, 24/7, from your smartphone, through the app My.Machine.

Being constantly connected to your machines will help you operate them even more efficiently and effectively. My.Machine lets you know where the machines are, if the operation is being carried out according to plans and at the scheduled time.

The machine's health status is constantly monitored. In the very unlikely event of a breakdown, you'll receive an alert notification directly on your smartphone, allowing you to take action promptly and immediately call the technical support.

You can check the battery conditions and the quality of the charges in order to optimize battery endurance and life cycle.

## GEOLOCALISATION

You know where  
your machines are

## USAGE INFORMATION

You know how your  
machines are used

## HEALTH STATUS

You know the health  
status of machines  
and batteries

## ENVIRONMENTAL IMPACT

You can check  
the machine  
consumption per  
intervention

## Protect the environment with efficient management of resources

With better management of resources, you can clean more sq.m with the same levels of consumption, avoiding waste. Fimap technologies optimize the use of water, detergent and energy to protect the environment and reduce the cost of cleaning per sq.m.

The Eco Mode function helps prevent water, detergent and energy consumption by using only the quantities you need and nothing more.

START&STOP

When the machine is idle, the brush motor, the vacuum motor\*, the traction and the water flow will turn off automatically, reducing costs and emissions. All the functions are reactivated automatically when the operator presence control is operated.

\* In basic and Pro versions suction turns off when the squeegee is lifted up

## WATER

### FLR-FIMAP LONG RANGE

Reduces water and detergent consumption per cleaning operation by up to 66%\*  
This is a system which recycles detergent solution to increase autonomy:  
to scrub more sq.m. while using less resources.

### FSS-FIMAP SOLUTION SAVER

Water and detergent quantities are separately dosed,  
reducing consumption by up to 50%.

### FWF-FIMAP WATER FLOW

Ensures uniform cleaning results across the entire working  
width on the first pass, optimizing detergent solution consumption.

## ENERGY

### FES-FIMAP ENERGY SAVER

Reduces energy consumption by up to 35%.

#### LED TECHNOLOGY

Up to 80% lower energy consumption than conventional headlights.  
The LED headlights consume much less energy than conventional headlights, offer a  
longer lifespan and illuminate with a brilliant white light similar to natural daylight.

## NOISE LEVELS

### FNC-FIMAP NOISE CANCELLING

Reduces sound pressure.

\*Saving calculated on a triple recycling cycle

Make it perfect for you:  
configure it with the characteristics  
that are ideal for your needs

## Choose your machine

DISC  
with 2 disc brushes  
or 2 pad holders.

CYLINDRICAL  
with 2 cylindrical brushes  
and a debris hopper  
for small sized solid debris.

LIGHT

MEDIUM

HEAVY

#### MxL DISC

The brush head with disc brushes is the most versatile option, as this can adapt to all types of hard floors, both smooth and irregular, in any environment. The force of the two brushes easily removes even stubborn dirt.

#### MxL CYLINDRICAL

The brush head with cylindrical brushes combines the scrubbing action with a sweeping action, which reduces the operation time when it comes to cleaning floors on which small solid residues are present, avoiding the need to sweep before scrubbing. The residues are collected in a drawer installed at the rear of the brush head, which is removable for emptying.

With flexible equipment options, you can configure it in the most convenient and beneficial way for you

## ACCESSORIES

A wide choice of disc or cylindrical brushes in PPL is offered, available in thicknesses from 0.3 to 0.9 cm. These offer the perfect solution for dealing with any type of dirt on any floor.

Abrasive brushes:

Ideal for heavy duty cleaning on industrial surfaces.

Rear squeegee rubber blades  
33 SHORE (PARA)

For maintenance cleaning of smooth floors.  
40 SHORE (PARA)

For stubborn dirt on floors with joints.

POLYURETHANE

For heavy duty cleaning on industrial floors, even with wide gaps.

# SERVICES

## CONSULTING AND PLANNING

We put our experience at your service, to help you realize the cleaning project perfect you. We suggest you the best solutions to make costs decrease and service quality increase.

## SETUP

We can help you set up your machines in order to make them meet specifically the requirements of the sites of your project, allowing you to always have control over costs and results.

## AUTHORIZED WORKSHOP NETWORK

Fimap Authorized Workshop network spans the globe, so you can enjoy the peace of mind of finding a professional support wherever your business is.

## CONFIGURATION

Your business is unique, only a customized fleet can lead you to better results. We will help you find the configurations that best fit the specific requirements of your cleaning sites, in order to optimize processes and lower costs.

## TRAINING COURSES

Fimap Academy offers courses for all levels, from the correct use of machines and technologies, up to the management of sites and tenders, helping you to make your service really competitive.

## MAINTENANCE AND REPAIR

For your business to run smoothly it is essential that your machines are kept always operational. Our technicians take care of monitoring the machines health status and know how to intervene quickly and effectively when needed.

## FINANCIAL SOLUTIONS

You can choose to use the fleet in different ways. We can advise you on the best financial solution for your business, so that you can get the quality of the Fimap world at the most convenient conditions for you.

## DIGITAL FLEET MANAGEMENT SYSTEM

With Fimap Fleet Management everything is under your control. You can have a complete overview of the service provided and find out the improvements that can be made, basing your considerations on real data, always available via the MyMachine app or FFM website.

## GENUINE SPARE PARTS

Get the most out of your machines, choose the reliability of Fimap original spare parts. They are designed together with the machines, so they perfectly fit them thus guaranteeing the highest quality of performance.

## CERTIFICATIONS
